

From Classroom Problem to Working Solution

How I Build Educational Tools with AI

I use AI as a collaborative partner to turn real challenges into practical tools for multilingual learners, educators, and families.

What is Vibecoding?

Vibecoding is the practice of using AI to rapidly design, build, test, and improve real-world solutions.

Lenguaje Labs

PRACTICAL AI TOOLS FOR
LANGUAGE LEARNING

Our Mission

Lenguaje Labs creates practical AI-powered tools that help multilingual learners, educators, and families access information, solve problems, and communicate more effectively.

Every tool begins with a real educational need.

A simple, iterative cycle. **Human purpose.** AI-powered.

1

Notice a Problem

Start with a real need from educators, students, or families.

2

Explore Ideas

Research, brainstorm, and talk it through with AI.

3

Build a Prototype

Build a quick prototype to test the idea.

4

Test with Real Users

Share with real people and gather feedback.

5

Improve and Share

Refine, iterate, and share so others can benefit.

MY TOOLKIT

ChatGPT
My thinking partner.

Claude
Deep reasoning and clarity.

Replit
Build and deploy fast.

Codex
AI coding assistant.

OpenCLAW
Open-source AI agent and digital assistant.

GitHub
Version control and sharing.

WHY VIBECODING MATTERS FOR SCHOOLS

Solve local problems quickly

Prototype ideas without big budgets

Create tools tailored to your community

Share expertise beyond your classroom

EXAMPLES FROM LENGUAJE LABS

Multilingual Learner Family Guide
Helping families understand language development.

LinguaFlow
Personalized reading for language learners.

EAL Desk
Centralizing resources for EAL educators.

Teacher Tools
AI-powered planning and support resources.

AI doesn't replace educator expertise. It helps educators turn expertise into tools.

Curiosity

Creativity

Collaboration

Impact
